ENVIRONMENTAL CONSIDERATIONS

Genesis Centre has been designed with the environment in mind and incorporates a number of sustainable features to improve energy efficiency and help reduce the environmental impact of the building.

Some of the measures incorporated in Genesis Centre include:

- Ground Source Heat Pumps
- Thermal Zoning
- Natural Ventilation
- Water Efficiency
- Sustainable Drainage Systems (SUDS)

The incorporation of these measures, into the building design has been recognised through the achievement of an 'Excellent' BREEAM rating.

BREEAM (Building Research Establishment Environmental Assessment Method) is the world's leading environmental assessment method for buildings and sets the standard for best practice in sustainable design. This assessment has become the standard measure of a building's environmental performance.
